Work Experience

Jun 2016 - Present

Bangalore

UI Lead Developer

Tapzo (formerly Helpchat)

Tasks/Achievements

- Worked as a lead Front-End Developer for creating the webview for the offers section of Tapzo Android app powered with React+Redux+Webpack.
- Created a dashboard for the Deals Pod in Helpchat to publish and maintain the content by the category team in Material-UI with React & Redux while taking care of web accessibility.
- Created a React web app for finding the nearest working ATM during the demonetization by Indian govt.
- Lead the development of the Recharge Deals, Outstation Cabs & Payments Section of the Helpchat app using React & Redux.
- Created a webview for the shopping assistant section of the Helpchat app in PolymerJS.
- Leading development of OneDirect(CRM) Dashboard Suite in Angular 4.

Jun 2014 - Apr 2016

Delhi

Full Stack Developer

Musejam

Tasks/Achievements

- **Musejam** - Led the development of the main web app of Musejam (musejam.com) in AngularJS+RequireJS. Created the whole architecture and custom components & directives along with analytics integration using Mixpanel.
- **LookManagers** - A fully responsive web Ecommerce app being used by Ridhi Mehra Productions (Bollywood Fashion Designer) built on LEMP stack. Made the backend REST APIs in Laravel and Front-End in AngularJS and Bootstrap. Built a Native cross platform mobile app for the same using Appcelerator Titanium (Alloy).
- **Muselook** - muselook.com is a customer end point web app built by me using AngularJS. It's being used by two clients right now. It has helped Ridhi Mehra scale her business by launching her dress collections on it and get bookings from customers.
- **Musejam Control Panel & Admin Panel** - AngularJS web apps for internal uses of Musejam organization. The admin panel is being used by the content managers and control panel is used by the artists who are verified on musejam.
